

Who Do You Trust

GG.marlene
SKINCARE PROFESSIONALS

We occasionally jot down some of the buzz words that are used to advertize skin care products in the media. This would be highly amusing if they were not so ludicrous. The FDA should crack down on these totally misleading and untrue statements.

Eye cream – works in the blink of an eye (Don't you wish!)

Moisturizer - #1 dermatologist recommended (Their favorite dermatologist!)

Anti-wrinkle cream -Instant results (Don't you really wish!)

Blemish remover – 82% disappear in 2 weeks (Quite simply - not possible!)

Dermatologist recommended (Their favorite dermatologist again!)

Clinically proven (Whose clinic?)

Scientifically tested (By whom?!)

There are many, and we mean many, spas (over-used and deceptive word that it is) that advertize and perform treatments that are reserved for dermatologists and the medical profession.

GG.Marlene operates within state and federal regulations and never makes untrue claims regarding services or products.
