

VITAMIN C

Vitamin C is a powerful ant-oxidant. It combats disease, including cancer as well as cardiovascular, degenerative and infectious disease. It slow the rate of free radical damage, provides, balances hormones, increases fertility, and it is essential to collagen production.

HERE'S WHAT YOU NEED TO KNOW

Vitamin C is not naturally created by the human body and therefore must come from our diet.

All fruits and vegetables contain Vitamin C with the highest quantities found in fresh, uncooked produce. The intake should be approximately 2.3 grams a day to maintain health and up to 10 grams a day to combat infectious diseases.

BENEFITS

Vitamin C improvement in firmness skin texture diminishes dark circle, eye puffiness, fine lines & wrinkles and hyperpigmentation. Also strength capillary's walls and breakdown histamines, minimizing allergic reactions and reducing the appearance of broken capillaries. Increased intake of dietary vitamin has also been correlated with a decreased risk of dry skin, and may slow down transdermal water loss.

TETRAHEXYLDECYL ASCORBATE

This compound of ascorbic acid and hexyldecanol is the current gold standard in Vitamin C derivatives for skin care. It is lipid-soluble, allowing it to easily penetrate the lipid barrier of the skin at a rate up to three times higher than ascorbic acid alone. One of the most important actions of tetrahexyldecyl ascorbate is its ability to stimulate glycosaminoglycans which increase collagen and elastin's ability to retain moisture in the dermis and epidermis.

YOUR SKIN HEALTH

As spa professionals, we can directly impact the health of our client's skin by choosing the most suitable ingredients offered in our Rejuveni SkinCare products.
